SUMMARY

MBA candidate with 10 years of experience in product development and platform engineering across healthcare technology. Proven product thinker with a track record of identifying systemic improvement opportunities and translating user and domain insights into high-impact product roadmaps. Skilled at bridging business workflows, engineering teams, and commercial objectives across the full product lifecycle.

SKILLS

Product and Strategy: Product Road Mapping, User and Domain Research, Go-to-Market Strategy, Data-driven Decision Making, Competitive Intelligence, ROI Modelling, Hypothesis-Driven Development

Technology and Platforms: Python, AWS Serverless, APIs, CI/CD, Test-Driven Development (TDD), ML Integration, Cloud Architecture, C# .NET, Lovable

Leadership and Delivery: Cross-functional Leadership, SAFe-certified Scrum Master, Program Management, Team Coaching, Process Optimisation, Continuous Delivery, Quality Audits

PROFESSIONAL EXPERIENCE

CitiusTech, India **2021 - 2025**

Technical Lead - Product and Platform Engineering ***October 2023 - July 2025***

- Identified a platform modernisation opportunity within a routine engineering ticket and led the end-to-end redesign from legacy batch processing to a serverless cloud architecture, delivering a system that became the technical foundation for a client-launched commercial product
- Owned end-to-end product delivery for 35-40 quarterly code set releases, redesigning validation pipelines to reduce cycle time from approximately 4 hours to under 20 minutes per release
- Translated complex technical requirements into actionable product roadmaps for non-technical stakeholders, improving scalability and reducing long-term technical debt
- Maintained delivery quality standards across 12 program teams, identifying process gaps and recommending improvements to strengthen overall delivery consistency

Technical Lead - Platform Engineering ***October 2021 - October 2023***

- Drove platform reliability improvement by automating incident detection and routing across 15-20 monitoring tools, reducing time from incident creation to correct team assignment from 30 to 5 minutes and directly supporting a 97% uptime SLA commitment
- Built Team Lotus, a new cross-functional engineering team largely through direct recruitment, and introduced Agile delivery practices from the ground up as SAFe-certified Scrum Master, reducing release cycles by 33% (15 to 10 days)
- Managed cross-functional workstreams to modernise legacy infrastructure, establishing high-availability approaches that protected client SLA commitments

Siemens Healthineers, India **2015 - 2021**

Senior Engineer - Product Development ***July 2016 - October 2021***

- Owned clinical workflow design and product integration of an ML-based lesion detection capability into syngo.via, Siemens Healthineers' flagship multi-modality imaging platform, as a **company-first initiative** in MI Oncology
- Led iterative co-design sessions with radiologists, senior product managers, and engineering teams to ensure a new AI-powered diagnostic workflow integrated seamlessly within established clinical practices and regulatory constraints
- Translated user and domain insights into a product roadmap that contributed to significant global revenue growth through a commercially differentiated capability showcased at major medical imaging conferences
- Partnered with regional teams to resolve a high-priority delivery bottleneck, driving measurable improvements in Customer Satisfaction (CSAT)

Systems Engineer - Software Development ***July 2015 - July 2016***

- Built and enhanced platform capabilities and automated 150+ manual test cases as a junior engineer with minimal support, establishing a testing infrastructure that was extended by the team for years

EDUCATION

MBA, Nanyang Business School, Nanyang Technological University, Singapore **July 2025 - June 2026 (expected)**

- **Strategic Consulting Project (SPAN), IBM Consulting**: Team Lead for "Project PRISM", an Agentic AI Digital Twin for commerce unifying a consumer's fragmented shopping identity across platforms, cards, and product categories; led business strategy workstreams including willingness-to-pay analysis, pricing strategy, market sizing, financial modelling, competitive benchmarking, and go-to-market planning for APAC market entry
- **Global Finalist, Kellogg-Morgan Stanley Sustainable Investment Challenge 2026** (London, April 2026): Led strategy and investor framing for a $250M blended finance fund targeting climate resilience in Vietnam's Mekong Delta
- **Asia Finalist, Venture Capital Investment Competition (VCIC) 2026**: Led commercial and technical due diligence for early-stage startups; presented investment recommendations to senior stakeholders
- **Winner, Mazda Strategy Challenge**: Led brand repositioning and Go-To-Market strategy for Mazda Singapore; identified an uncontested customer segment competitors had overlooked, conducted customer segmentation and competitor benchmarking, and delivered app mockups and an AI-generated brand video

Post Graduate Diploma in Machine Learning and Artificial Intelligence, IIIT, India **May 2020 - May 2021**

Bachelor of Engineering, National Institute of Engineering, India **July 2011 - July 2015**

- Published a research paper on development of a system to monitor and regulate the impact of vehicular pollution on the environment in the International Journal of Engineering Research and Technology (IJERT) in 2015 (IISN: 2278-0181)

CERTIFICATIONS

- SAFe Agilist - SAFe® 5 Scrum Master
- AI Agents and Agentic AI with Python & Generative AI

AWARDS AND LEADERSHIP ACTIVITIES

- Recognized by senior leadership for stabilizing a multi-product engineering ecosystem during major organizational transitions while ramping up a newly formed team
- Volunteer and mentor in community health initiatives; active content creator on LinkedIn sharing insights on Cloud, AI, Product Thinking, and Leadership
